Leetcode: [LeetCode Profile](#) GeeksForGeeks: [GeeksforGeeks Profile](#)

CS undergraduate (GLA University, expected June 2027) with full-stack MERN experience and strong DSA foundation — built and deployed 3+ real-time, secure web apps using JWT, Socket.IO, and Razorpay. Solved 400+ DSA problems.

EDUCATION

Bachelor of Technology in Computer Science, GLA University, Mathura, 7.6/10 CPI	Expected June 2027
Intermediate, Ganga Inter College, Ghaziabad, 83%	May 2022
High School, S.D Memorial Inter College, Ghaziabad, 84.6%	May 2020

TRAINING / EXPERIENCE

AppSquadz Software Pvt. Ltd.	June 2025- July 2025
Trainee	

- Spearheaded the end-to-end development of **Homigo**, a startup-focused marketplace connecting Airbnb hosts with caretakers, driving the project from initial design to a production-ready MVP.
- Architected secure financial and security protocols by integrating the Razorpay API with automated webhook verification and implementing JWT-based multi-tenant authentication.

PROJECTS

GameZone: https://gamezone-b34r.onrender.com/	Dec 2025 – Jan 2026
--	---------------------

Node.js + Express 5, MongoDB with Mongoose, Socket.io, JSON Web Token (JWT) + bcryptjs, chess.js, Render, React 18 + Vite, API

- Built full-stack gaming platform (React 18 + Vite frontend, Node.js/Express 5 backend) deployed as a single Render service serving both API and SPA — reducing infra complexity and deployment overhead.
- Engineered real-time multiplayer engine (Socket.io) supporting live chess/tic-tac-toe move sync, in-game chat, draw offers, and rematch with <100ms sync latency — backed by MongoDB + Mongoose for persistent match history and user data.
- Implemented JWT authentication and bcryptjs password hashing with express-rate-limit throttling to prevent abuse, plus per-user game stats (wins/losses/draws) tracked across game types for player progression.

API-GATEWAY:

Sep 2025 – Dec 2025

Node.js/Express, Socket.IO, JWT/bcrypt, express-rate-limit throttling, CORS.

- Single Entry Point & Routing — Acts as a unified front door for all client requests, routing them to the appropriate microservices/backends based on paths, methods, or headers.
- Security & Access Control — Enforces authentication (OAuth2, JWT), authorization, API keys, rate limiting, throttling.

Homigo: <https://homigo-cp8k.onrender.com/>

June 2025 – July 2025

MERN Stack, JWT, Razorpay, Node.js, Render, Cloudinary, EJS

- Developed a specialized service marketplace that facilitates seamless coordination between property owners and caretakers, addressing the "on-demand" needs of the Airbnb ecosystem.
- Streamlined the booking lifecycle by implementing secure JWT authentication for user sessions and integrating Razorpay for end-to-end payment processing and verification.
- Optimized asset management by integrating Cloudinary for automated image hosting and delivery, reducing server load and improving page load speeds for high-resolution property listings.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL.

Web Development: MongoDB, Express.js, React.js, Node.js, HTML, CSS, REST APIs, JWT Authentication.

Databases: MySQL, MongoDB.

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), DBMS, CN.

Tools & Testing: VS Code, Postman, Git & GitHub.

CERTIFICATIONS

NODE.JS - Intermediate Level	(by HackerRank)	April 2026
MONGODB - Intermediate Level	(by DataCamp)	may 2026
JAVA - Intermediate Level.	(by HackerRank)	Dec 2025

COMPETITIVE PROGRAMMING

LeetCode: Solved 400+ problems in Data Structure and Algorithms.

GeeksforGeeks: Solved 100+ problems across Core DSA topics.
